Have You Lost Your Spark?

When your hormones are out of balance...Life is out of balance

- ✗ Your mood (stress hormones)
- ✗ Your desire (sex hormones)
- ✗ Your weight (metabolic hormones)

They all influence each other and when one is off it's a domino effect

And over time it's easy to accept this imbalance as normal...

That was me...

And I didn't know how I was going to fix it. But I was determined that I would

I was suffering from hot flushes, night sweats, mood swings, tired all the time and worst of all felt fat and ugly. And sex was the last thing on my mind!

If this is what life was going to be like forever more I just didn't want it

And my poor husband didn't know what to do to help

I discovered that the hormone imbalances during menopause were the cause of all of this and could be re-balanced naturally (I couldn't take HRT)

I'm going to share with you what I found...

Because I Couldn't Accept This As Normal

Fast forward to today, I'm happier in myself, my weight is under control and my husband's got his wife back

Your “prime of life” doesn’t need to be a thing of the past

Clinical research has shown the best way to reverse the “domino effect” is to balance all three hormone categories at the same time

This is exactly what the Happy Hormones Pack does

3 of our most popular products powered by potent adaptogens and the world’s first quadbiotic for weight loss

To turn on your most vibrant self

Nothing's worse in marriage than wanting to want to..but not feeling it

I know I'm not alone 😞

As we get older it's natural for our hormones to be out of whack

The trouble is that most of us just accept it and are left to white knuckling it in the bedroom

We think that the honeymoon is most definitely over... and just grin and bear it 'cause you love your spouse.

Sound familiar?

I'm here to tell ya...it doesn't have to be that way!

Cheers to Happy Hormones! 🍷

These cute little capsules have balanced my hormones

How do I know?

✓ Let's just say intimacy is at an all time high in our 50's 💕

✓ I've lost that menopause belly

✓ And sleeping like a baby is my new normal

I feel like myself again...and my body is acting like her younger self too 😊

If you're ready to **reignite the spark in your marriage...** and handle the holidays with REAL inner Joy, this is for you

Friend....Let's have more FUN this holiday season 🥰

Menopause! I was told that weight gain, hot flashes, belly bloat and mood swings were all "normal" unless I wanted to be on hormone replacement therapy. I wasn't keen on that idea, but I also wasn't keen on feeling like a bloated mess either.

Enter the Happy Hormones Pack...

I had no idea I'd see results this quickly! I've tried so hard to lose weight for months with no success.

Enter the Happy Hormones pack, Energy+, and MentaBiotocs ...fewer hot flashes, no more night sweats, less mood swings and - my belly is shrinking! I've dropped from 194 to 185 in less than a month - 18 days to be exact. So surprised at the quick results.

This has changed my life.

Just wanted to share my testimony so far!! I've been on the happy hormones pack since October 25th! I have slept through the night since starting this, way less stressed, just more focused and calm, no crashing mid day I feel clear minded and I don't lay down for a nap bc I truly just don't feel tired like I was-

So things are already starting to get back aligned and really so grateful for that alone!

...

I started the happy hormones pack in October, I am starting my third month of them. I absolutely love it. I don't feel cloudy, I'm sleeping better, have lost 10 pounds, no longer have the midday slump, I'm not bloated, feel empty after going to the washroom.

I had a complete hysterectomy at the age of 35, then turned 36 the next day. It has been 10 years since that surgery. I was on no hormones at all, but started to notice some unpleasant things, like dryness, weight gain. The doctor wanted me to go on estrogen a couple years ago and I was not a fan of that. My cousin introduced me to this company and I thought what do I have to lose.

Thank you amare.

As a board certified Obesity and Family Medicine physician, I am continually impressed by these innovative products!

February 2022-I started when GBX fit came out. I love that all of the gut hormones are addressed unlike the newer medicines out that only address 1 or 2 gut hormones. Cortisol and thyroid hormone balancing are also helped by GBX fit!

March-I added in Mood plus! We all have stress! Cortisol balancing is crucial! I have always said that you can eat correctly and exercise consistently but you won't lose weight if stress is not managed appropriately!

June-I earned the incentive to be an IGNITE product tester! I have lost more inches and am more toned! I feel like a teenager! After having ovarian failure and a hysterectomy, I am overjoyed at my sexual wellness improvements!

The HAPPY HORMONE pack is a phenomenal trio of the above 3 products to address metabolic, stress, and sex hormone balancing plus plus plus all of the other benefits that each product has!

Hormones play a huge role in obesity, especially visceral fat accumulation in the abdominal area which causes dis-ease!

Don't focus on the scale number! It's doesn't give the full picture! Take your photos! Take your measurements! This is 30 inches and 13 pounds in 5 months! It feels like I have lost 30 pounds!

Focus on how you feel and all of the nonscale benefits!

Give yourself at least 90 days! With any medicine or supplement, it takes time! Our bodies have been negatively impacted by stress, toxins, inflammation, hormone imbalances, poor sleep, etc for years or even decades! It's a process to heal! Be patient!
